

# MATHEMATICS LESSON

## MEASUREMENT

Note: This lesson is designed to accompany a reading of the book "Guess How Much I Love You" by Sam McBratney  
Connection: In this story, the little rabbit tries to tell his dad he loves him the most. We are going to use a ruler and candy hearts to make lines full of love that you can measure!

Objective: Use candy hearts and a ruler to create lines of specific length (inches).

### **MATERIALS NEEDED:**

- Candy Hearts
- Ruler
- Number Flashcards

### **INSTRUCTIONS:**

- Draw a number card
- Find that number on the ruler
- Line up the candy hearts until they reach that number (you may need some smaller pieces to make it exact)
- State the length of the line: "This line of hearts is 3 inches long"
