

MATHEMATICS LESSON

COUNTING & 1:1 CORRESPONDENCE

Note: This lesson is designed to accompany a reading of the book "Love Monster" by Rachel Bright.

Connection: The monster in this book goes out searching to find love. He looks high and low and middle-ish. He looks inside and outside and close by and far away. We are going to roll the dice and use our counting skills to see if we can get to the big heart at the end of the game!

Objective: Roll the dice, count and identify the number, then demonstrate 1:1 correspondence by moving a game piece the correct number of spaces.

MATERIALS NEEDED:

- Small items to use as game pieces (erasers, dimes, etc)
- Dice
- Game board, printed and laminated

INSTRUCTIONS:

- 1. Roll the dice. Count the dots.
- 2. Move the piece the corresponding number of times.
- 3. If you land on a monster you have to go back two spaces.
- 4. First one to the big heart is the winner!
